

RoHS & REACH - EU regulatory Compliance Statement

MIKROKLIMA s.r.o. develops and manufactures electronic modules and control systems in compliance with applicable European Union legislation concerning hazardous substances and chemical regulations.

In the design and manufacturing of our products, we consider the requirements of:

- the RoHS Directive (Restriction of Hazardous Substances), which restricts the use of certain hazardous materials in electrical and electronic equipment,
- the REACH Regulation (Registration, Evaluation, Authorisation and Restriction of Chemicals), which governs the registration, evaluation and use of chemical substances within the EU.

Compliance is ensured through a structured approach that includes:

- controlled component and material selection,
- supplier material declarations and documentation review,
- internal compliance checks during development and production processes,
- ongoing monitoring of relevant regulatory updates.

As many of our products are supplied as OEM modules intended for integration into end devices, product-specific compliance statements and supporting documentation are available to customers upon request.

Mikroklima s.r.o. remains committed to transparency and cooperation with customers and business partners in meeting applicable regulatory requirements.

Effective date: March 2026

Approved by Management of MIKROKLIMA s.r.o.
